

Privacy barriers & partitions

Our terrace or balcony is a secret retreat from everyday noise and stress. It is understandable that we want to create a place that is exclusively for our relaxation. Everyone knows that the feeling of always being watched makes this legitimate desire for privacy impossible. Our modern privacy barriers and partitions create a peaceful place that you are longing for.

The fence elements are built into a stable frame construction and are bolted onto square or round posts, depending on the model. The posts are anchored firmly into the subsoil. Whether they are set up straight or at angles, these elements are designed to harmonize with their surroundings. Plants are also included in the concept; there are trellises integrated into the "Ulm" model, for instance.

Privacy barriers & partitions
