

Fences & posts

Whether a playground is to be fenced in, a trellis work fence is to be erected for protection against wind and to ensure privacy, a sound dampening wall is to be installed to cut down on noise -- fences and barriers made of wood meet a broad array of requirements. Furthermore, with the right form, they fit outstandingly into every landscape.

With our fences we offer you custom tailored solutions for private or public applications.

Fences also available without arches

Various, high quality fittings available

Posts and fences and other varieties of wood; prices on request. Special dimensions are available.

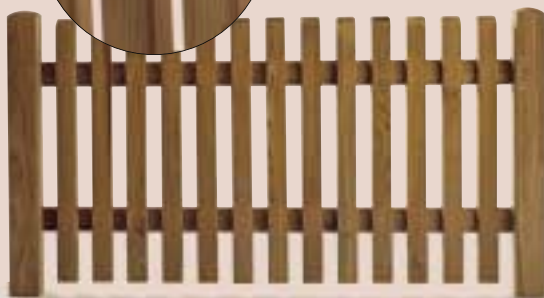

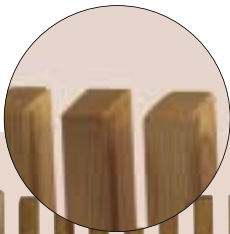

Pergolas made of square timbers or roundwood are manufactured according to your individual specifications. This makes it possible to create practically any design. Pergolas overgrown with creeping plants offer outstanding privacy and protection from wind, not to mention that they are a first-class eye-catcher.
